

Table of Contents

PART 1: STRATEGIC ISSUES AND FORECASTS

Six MSS operators generating \$1.2 billion wholesale revenues in 2008.....	5
<i>Top three operators accounting for 88% of the market in 2008.....</i>	5
<i>More than two million MSS terminals deployed in 2008</i>	5
<i>Six MSS operators currently active.....</i>	6
<i>Only two MSS operators with positive EBITDA in 2008</i>	8
The MSS value chain.....	8
MSS a heterogeneous industry	9
<i>Very different types of terminals and applications</i>	9
<i>Usage mainly in specialized vertical markets.....</i>	9
Key trends and drivers in the MSS industry.....	10
<i>Strong growth in data applications</i>	10
<i>Change in usage patterns with new applications</i>	11
<i>More capable terminals, however with certain limitations.....</i>	11
<i>Strong growth in emerging regions.....</i>	11
<i>Regulation is driving but also inhibiting MSS growth.....</i>	11
<i>New emerging market segments about to take off.....</i>	11
<i>Continuous demand from government and military user markets.....</i>	12
<i>Strong competition from other technologies</i>	12
<i>Pricing to slightly decrease over time.....</i>	12
<i>Convergence of technologies</i>	12
MSS industry forecasts to 2018.....	13
<i>North America estimated to remain leading region for MSS communications.....</i>	13
<i>Strong terminal market on land with MSS wholesale revenues soaring for maritime and aeronautical markets... </i>	14
<i>MSS broadband will be driving revenues; M2M will drive terminals</i>	15

PART 2: MSS OPERATORS AND THE VALUE CHAIN

The MSS Operators

MSS OPERATORS' FINANCIALS	27
Six MSS operators generated \$1.23 billion of wholesale revenues in 2008.....	27
<i>Top three operators account for close to 88% of the market in 2008.....</i>	27
<i>New market entrants on the verge of entering the field.....</i>	27
Mixed financial performance among the operators	27
<i>Tough times for certain operators after 2005.....</i>	27
<i>Only two MSS operators are currently profitable</i>	28
Only three MSS operators reported revenue growth in 2008.....	28
Profit margins reflect the difficulties faced by a number of operators	32
<i>Good EBITDA performances for two operators.....</i>	32
<i>Mixed performance in net results among the operators</i>	33

<i>MSS operators have significantly different cost structures</i>	33
<i>Capital expenditures and financing needs ahead</i>	35
<i>Stock performance of MSS operators reflects the difficult market conditions</i>	37
OPERATORS' STRATEGIES AND POSITIONING.....	38
Value propositions of operators are evolving with market expansion	38
Diversified product portfolios of MSS operators.....	39
Strategic initiatives for the coming years	41
Structural trends for MSS operators	43
<i>Financing of MSS operators</i>	43
<i>Horizontal consolidation and vertical integration ahead</i>	45
<i>New applications bring new business models and new forms of distribution</i>	45
<i>Spectrum still a scarce resource in the MSS world</i>	46
Technology trends	46
<i>Increasing capabilities with new-generation MSS satellites</i>	46
<i>Other major technology trends</i>	47

MSS Distribution and Value Chain

MSS SERVICE DISTRIBUTORS	51
Service distributors connecting the MSS industry with the user group	51
<i>Service distributors as key element in the MSS value chain</i>	51
<i>First-tier MSS service distribution market featured by concentration</i>	51
<i>Fragmented second- and third-tier distribution market</i>	53
<i>One-stop-shop strategy combines services, equipment, MSS, and FSS</i>	53
Key trends and drivers for MSS service distributors	55
<i>Revamped Inmarsat CFA to change the market structurally</i>	55
<i>Vertical integration to impact industry future</i>	56
<i>Distribution channel to become more diversified, especially for mass market products</i>	57
Outlook for MSS service distribution.....	57
SHORT PROFILES OF SAMPLE MSS SERVICE PROVIDERS	58
Stratos Global.....	58
Vizada.....	58
Satcom Group	59
SingTel	59
OTESat Maritel	60
Globe Wireless.....	60
OnAir	60
AeroMobile	60

PART 3: APPLICATIONS AND MARKETS

MSS Broadband

A new generation of MSS products and services	67
---	----

<i>Evolution of MSS data terminals moves towards broadband</i>	67
<i>BGAN sets new standards for MSS high-speed data communication</i>	68
Impact of MSS broadband on the industry value chain	69
Key addressable markets for MSS broadband	70
<i>Traditional MSS markets start to migrate to broadband</i>	70
<i>Land market</i>	71
<i>Maritime market</i>	71
<i>Aeronautical market</i>	71
In 2008, MENA was still the region with the highest usage levels.....	71
Current trends indicate strong growth for MSS broadband.....	72
<i>Increasing demand for data applications</i>	72
<i>Higher capacity usage per terminal</i>	72
<i>Increase in broadband penetration in maritime and aero markets</i>	73
<i>Heavy usage in emergency response and quick deployment situations</i>	73
<i>Increased service offering in key addressable regions</i>	73
<i>Global coverage of MSS systems</i>	73
Heavy competition is coming from different directions	74
<i>Fast progression for mobile VSAT</i>	74
<i>Competitive terrestrial technologies</i>	74
<i>Capacity limitations and constraints</i>	75
<i>Limitations in terms of addressable market</i>	75
<i>High pricing relative to other technologies</i>	75
Forecast for MSS Broadband to 2018	76
<i>Total MSS broadband terminals to grow to over 217,000 by 2018</i>	76
<i>Wholesale MSS broadband revenues will exceed \$800 million in 2018</i>	76
<i>Growth will lead to a more balanced regional distribution by 2018</i>	77

MSS M2M Market

M2M, a fast growing market.....	87
<i>MSS enabling ubiquitous M2M communications</i>	87
<i>Key vertical markets driving the growth</i>	87
<i>Emerging market segments bringing more opportunities</i>	89
<i>A \$94 million market in 2008 for MSS operators</i>	89
<i>North America as the largest MSS M2M market</i>	89
Business models and market structure of MSS M2M industry	90
<i>A choice between capacity wholesale and solution provision</i>	90
<i>Value-added resellers playing a key role in the value chain</i>	91
<i>A low ARPU business relying on the volume of terminal deployment</i>	91
<i>M&A consolidating the M2M market</i>	91
Key trends shaping the industry's future	92
<i>North America still dominating, but other regions catching up</i>	92
<i>Strong competition from other technologies</i>	92
<i>A move to hybrid communication networks</i>	93
<i>Hardware costs keep decreasing</i>	94
<i>Introduction of new maritime regulations stimulating a new round of rollout</i>	94

<i>The economic downturn slows near-term growth</i>	94
<i>The launch of new constellations injecting fuel for growth acceleration</i>	95
<i>New distribution channels further pushing growth</i>	95
Forecast for M2M & asset tracking applications to 2018	95
<i>More than 5.4 million MSS M2M terminals in service by 2018</i>	95
<i>Wholesale revenues to more than triple by 2018</i>	95
<i>Land market always dominant in the MSS M2M industry</i>	96
<i>Regional distribution to be more balanced</i>	96

MSS Handheld Market

Handheld is the historic MSS market	105
<i>Handheld has driven the MSS industry to expand beyond maritime</i>	105
<i>Professional users representing the key addressable markets</i>	105
<i>Handheld still the second-largest MSS market</i>	106
<i>The Middle East and Africa leading the global handheld market</i>	107
Key issues influencing the handheld market	108
<i>An event-driven market</i>	108
<i>Diversified distribution channels</i>	109
<i>A choice between satellite-only and dual-mode phones</i>	109
<i>Divergence in end user equipment design</i>	110
Competition to get tougher	111
<i>Strong competition from other technologies continues to be a major hurdle</i>	111
<i>Limited growth opportunities for the overall handheld market?</i>	112
<i>The entry of Inmarsat to intensify competition among MSS operators</i>	113
Forecast for MSS handheld to 2018.....	114
<i>Number of MSS handheld active terminals to double by 2018</i>	114
<i>Wholesale revenue to reach \$600 million</i>	114
<i>The Middle East and Africa to remain in leading position while regional distribution becomes more balanced</i> ..	114

New Hybrid Networks – ATC/CGC

ANCILLARY TERRESTRIAL COMPONENTS (ATC)	125
Hybrid terrestrial/mobile satellite systems have been in development for several years.....	125
<i>ATC still lacking market acceptance</i>	125
<i>Early attempts were made to attract niche markets, but future efforts focus on the mass markets</i>	125
The MSS/ATC license is subject to several criteria.....	126
<i>FCC requirements for the ATC license</i>	126
<i>Four operators currently have an ATC licenses</i>	126
SkyTerra (formerly Mobile Satellite Ventures)	126
<i>The first licensee already operable for MSS services</i>	126
<i>A two-satellite system for SkyTerra’s ATC service</i>	127
<i>Agreements and partnerships with Harbinger, Inmarsat, Nortel and Qualcomm</i>	127
Globalstar.....	128
<i>Large existing MSS customer base and an ATC license</i>	128
<i>A new satellite constellation will be deployed starting in 2010</i>	128
<i>Major agreements with Open Range, Hughes, Ericson and Qualcomm</i>	128

TerreStar Corporation	128
<i>Licensed in North America with expected operations by early 2010.....</i>	<i>128</i>
<i>After several postponements, TerreStar-1 was finally launched in July 2009.....</i>	<i>129</i>
<i>Major investors are now Harbinger and EchoStar</i>	<i>129</i>
ICO.....	129
<i>After a successful satellite launch in 2008, ICO North America filed for Chapter 11 in 2009.....</i>	<i>129</i>
<i>Despite early stage partnerships, ICO never started commercial service.....</i>	<i>130</i>
Spectrum of highest value for operators, but not without associated costs	130
<i>Acquiring the license is only the beginning of operations</i>	<i>130</i>
<i>Spectrum value has not yet materialized</i>	<i>131</i>
Terrestrial network costs very high compared to the space segment.....	132
<i>ATC ground repeater networks unlikely to be completely financed by satellite operators.....</i>	<i>132</i>
<i>Equipment and terminal manufacturers play a critical role</i>	<i>133</i>
Several strategic partnerships and business models possible	133
<i>Possible partnerships for MSS/ATC operators.....</i>	<i>133</i>
<i>Will big telecommunication providers enter the MSS market?.....</i>	<i>133</i>
<i>Could mobile satellite TV services be an option?</i>	<i>134</i>
<i>Could WiMax partnerships will develop a market?</i>	<i>134</i>
CGC – THE HYBRID NETWORK APPROACH IN EUROPE.....	134
Current regulatory situation.....	135
Solaris Mobile	135
Inmarsat	136
KEY ISSUES FOR HYBRID SATELLITE TERRESTRIAL MOBILE NETWORKS	136
POSSIBLE IMPACTS OF HYBRID NETWORKS (ATC/CGC) ON THE MSS INDUSTRY	138

Government and Military User Markets

Government still the single most important customer for the MSS industry.....	141
<i>Significant growth in MSS services since 2002</i>	<i>141</i>
<i>Military and civil users have different satellite service requirements</i>	<i>142</i>
The U.S. is still the largest government MSS user	142
<i>Demand for MSS essentially driven by US government users.....</i>	<i>142</i>
<i>The bulk of the US troops is concentrated in the Middle East</i>	<i>144</i>
<i>The US DoD has the largest satcom budget.....</i>	<i>144</i>
<i>Two contract vehicles for acquiring commercial satellite capacity</i>	<i>145</i>
Non-US government customers' use of MSS	146
<i>Complex military needs shape requirements related to MSS services</i>	<i>146</i>
<i>Operators and service providers have developed customized solutions to meet military requirements.....</i>	<i>147</i>
<i>Service distribution for government/military users.....</i>	<i>148</i>
Good prospects for future MSS miltatcom needs.....	149
MSS solutions for disaster relief and use in emergency situations.....	149

Competitive FSS Technology – Mobile VSAT

Finally, a solution in the search for high-speed mobile broadband?	153
<i>Constraints of MSS capabilities have created a need for alternative solutions.....</i>	<i>153</i>
<i>Technological progress makes mobile VSAT a viable option</i>	<i>153</i>

<i>A number of issues need still to be solved</i>	154
The business model of mobile VSAT is different than that of MSS	155
Increasing overlap between mobile VSAT and MSS in target markets.....	156
<i>Mobile VSAT gaining momentum in all major market segments</i>	156
<i>Maritime</i>	156
<i>Aeronautical</i>	157
<i>Land</i>	157
A number of growth drivers but also some hurdles ahead for mobile VSAT.....	158
<i>High data rates and fixed monthly pricing contribute to growth</i>	158
<i>High capex and installation costs still a major hurdle</i>	159
Current mobile VSAT markets on a different level of maturity across the segments, but they're growing	159
<i>Increasing overlap for VSAT and MSS in maritime and aero markets</i>	159
<i>Maritime VSAT, a sizable market ready to increase market share</i>	159
<i>Aeronautical VSAT just beginning but with growth opportunities</i>	160

PART 4: MARKET DYNAMICS FOR THE MSS USER SEGMENTS

Maritime MSS Markets

Maritime a continuously growing market for MSS.....	169
<i>Close to 260,000 maritime MSS terminals active at year's end 2008</i>	169
<i>Inmarsat still leading operator in the maritime segment</i>	169
Most important maritime market for MSS still commercial shipping	170
Strongest traffic in the Northern Atlantic and the Asia Pacific region	171
An increasing variety of MSS products to support end-user applications	172
<i>Major applications for MSS in maritime markets</i>	172
<i>Increasing variety of MSS products for maritime markets</i>	173
Service provider landscape for maritime markets getting more specialized	173
Regulation increasingly plays a role in maritime communications	174
<i>General facts about maritime regulation</i>	174
<i>International regulatory authorities</i>	174
<i>Strong international regulations for MSS applications</i>	174
<i>Major regulatory market-barriers</i>	176
Key trends and drivers for MSS in the maritime market.....	176
<i>Broadband solutions as a revenue driver</i>	176
<i>Price of equipment a major purchase decision</i>	177
<i>Service pricing still relatively high</i>	177
<i>Increasing number of applications, but not all are made for MSS</i>	178
<i>Larger ships deploy more than just one satcom system onboard</i>	178
<i>Crew welfare, a productivity issue</i>	178
<i>Automation a key trend in professional maritime markets</i>	179
<i>Satcom helps to do business at sea</i>	179
<i>Low data rate applications present an increasing opportunity for MSS</i>	179
MSS increasingly threatened by maritime VSAT	179
Deep impact of the financial and economic crisis on the maritime industry	181

Forecast for the maritime MSS market to 2018	182
<i>Addressable market remains limited but will continue to grow.....</i>	<i>182</i>
<i>Maritime MSS terminals to grow at a CAGR of 7.5% from 2008 to 2018.....</i>	<i>183</i>
<i>MSS wholesale maritime revenues to exceed \$760 million by 2018.....</i>	<i>183</i>
<i>Europe expected to remain the leading region for maritime revenues.....</i>	<i>184</i>

Land MSS Markets

Land markets very heterogeneous for MSS communications	193
<i>A large and very diverse market.....</i>	<i>193</i>
<i>Government users are the most important land mobile customers.....</i>	<i>193</i>
<i>Strong competition among MSS operators for land market share.....</i>	<i>194</i>
A variety of applications for different vertical markets	194
<i>MSS service usage level by vertical market.....</i>	<i>195</i>
<i>Voice still the dominant land mobile application</i>	<i>195</i>
<i>Broadband data application on the rise</i>	<i>196</i>
<i>M2M has high share in terminals but low share in revenues.....</i>	<i>197</i>
<i>Examples of land MSS products and services.....</i>	<i>197</i>
North America and the Middle East are the largest land mobile markets.....	197
Major trends and drivers for the land MSS market	198
<i>Advent of MSS broadband creates new types of users.....</i>	<i>198</i>
<i>More and more sectors rely on MSS M2M solutions.....</i>	<i>198</i>
<i>Government and Military will remain major drivers.....</i>	<i>199</i>
<i>Competition from terrestrial technologies still a major issue</i>	<i>199</i>
<i>Opportunities appear in the combination of satellite and terrestrial.....</i>	<i>199</i>
Forecast for land MSS markets to 2018	200
<i>M2M the main growth driver in terms of MSS terminal numbers.....</i>	<i>200</i>
<i>Global wholesale land revenues to increase at a ten-year CAGR of 8%</i>	<i>200</i>
<i>North America expected to remain the leading region for land revenues</i>	<i>201</i>

Aeronautical MSS Markets

A nascent market with significant growth potential	209
<i>In 2008, MSS aero wholesale revenue increased by 42%.....</i>	<i>209</i>
<i>Two MSS operators control the market</i>	<i>209</i>
A variety of new MSS aero products have come to the market.....	210
Despite the global nature of the aero market, a regional focus is observed	210
Different dynamics in the various addressable aero markets.....	211
<i>Three major aeronautical verticals key for MSS.....</i>	<i>211</i>
<i>Business aviation a current growth market for MSS.....</i>	<i>212</i>
<i>Commercial Airlines, a difficult market with growth opportunities</i>	<i>213</i>
<i>Government/military</i>	<i>213</i>
<i>Several other vertical markets with growth potential</i>	<i>214</i>
Key applications driving the demand for satcom in the aeronautical market.....	214
<i>MSS still mainly used for cockpit communications</i>	<i>214</i>
<i>.....with a beginning demand for cabin communications.....</i>	<i>215</i>
Increasing number of service providers plays a crucial role for MSS aero business.....	216

Regulation a key issue in a highly controlled market environment.....	216
<i>Some general facts about aeronautical telecom regulations</i>	<i>217</i>
<i>One large international regulatory authority</i>	<i>217</i>
<i>Aeronautical regulation principles</i>	<i>217</i>
Other major trends and drivers for MSS in the aeronautical markets.....	219
<i>Introduction of MSS broadband as main growth driver</i>	<i>219</i>
<i>Relatively low cost and small equipment an advantage for MSS.....</i>	<i>219</i>
<i>Demand for basic voice and low data rate services still high</i>	<i>219</i>
<i>The uptake of in-flight entertainment services</i>	<i>219</i>
<i>Competitive technologies may limit the growth of MSS.....</i>	<i>220</i>
<i>... in particular competition from VSAT.....</i>	<i>220</i>
<i>Health of the aeronautical industry – impact of the economic crisis</i>	<i>220</i>
Forecast for the aeronautical MSS market to 2018	221
<i>Growth in terminals driven by various applications.....</i>	<i>221</i>
<i>MSS aeronautical wholesale revenues to grow at a CAGR of over 16%</i>	<i>221</i>
<i>North America remains the leading region for aeronautical satcom.....</i>	<i>222</i>

PART 5: FIVE REGIONAL PROFILES

North America

A highly developed market that is starting to be saturated in revenues	231
<i>MSS wholesale revenues of \$402 million for North America in 2008.....</i>	<i>231</i>
<i>Most MSS operators derive the majority of their revenues from North America</i>	<i>231</i>
<i>A large number of service providers and resellers facilitate market access.....</i>	<i>232</i>
Regulatory aspects of MSS in North America	232
<i>Homogeneous regulation in region</i>	<i>232</i>
<i>Rules governing the frequencies allocation.....</i>	<i>232</i>
<i>Access to the market and licenses</i>	<i>233</i>
<i>Foreign ownership rules:</i>	<i>233</i>
<i>Ancillary Terrestrial Components (ATC) regulation</i>	<i>233</i>
<i>Major regulatory issues</i>	<i>234</i>
Growth among all major MSS market segments.....	234
<i>Maritime</i>	<i>234</i>
<i>Land.....</i>	<i>234</i>
<i>Aeronautical.....</i>	<i>235</i>
Strong concentration of M2M asset tracking as well as handheld terminals.....	235
<i>M2M.....</i>	<i>235</i>
<i>Handheld</i>	<i>235</i>
<i>MSS Broadband</i>	<i>235</i>

Central and South America

A relatively small MSS market that still needs time to develop	241
<i>Central and South America the smallest regional MSS market in 2008.....</i>	<i>241</i>
<i>Five MSS operators provide services to the region.....</i>	<i>241</i>

<i>Service distribution still problematic in Central and South America</i>	242
Regulations governing MSS in Central and South America	242
<i>Heterogeneous regulatory situation across Latin America</i>	242
<i>Rules governing the allocation of frequencies</i>	242
<i>Market access policies and licensing</i>	242
<i>Foreign ownership rules</i>	243
<i>Main regulatory issues and future perspective</i>	243
Land remains the dominant market segment.....	244
<i>Maritime</i>	244
<i>Land</i>	244
<i>Aeronautical</i>	244
Market driven by M2M and handheld markets.....	244
<i>M2M</i>	244
<i>Handheld</i>	244
<i>MSS Broadband</i>	245

Europe

A relatively mature market for MSS.....	251
<i>A strong maritime market and broad terrestrial coverage on land</i>	251
<i>Inmarsat remains the leading operator in Europe</i>	251
<i>A well-established distribution network</i>	252
Regulatory aspects for MSS in Europe	252
<i>Harmonized regulation within Europe</i>	252
<i>Rules governing the frequencies allocation</i>	252
<i>Access to the market and licenses</i>	253
<i>Foreign ownership rules:</i>	253
<i>Complementary Ground Components</i>	253
<i>Main regulatory issues and future prospective:</i>	254
The region is driven by a strong maritime market.....	254
<i>Maritime</i>	254
<i>Land</i>	255
<i>Aeronautical</i>	255
Besides strong-legacy narrowband business, broadband a main future driver	255
<i>M2M</i>	255
<i>Handheld</i>	255
<i>MSS Broadband</i>	255

Middle East and Africa

MEA market still largely driven by military activity	261
<i>Growth in the region has slowed since 2006</i>	261
<i>Thuraya still enjoys the highest market share in the MEA region</i>	261
<i>Service distribution is still an issue in the region</i>	262
Regulatory aspects for MSS in the Middle East and Africa	262
<i>Countries in the region have very different regulatory situations</i>	262
<i>Rules governing the frequencies allocation</i>	262

<i>Access to the market and licenses</i>	263
<i>Foreign ownership rules:</i>	263
<i>Main regulatory issues and future prospective</i>	264
The region is still driven by government and military users.....	264
<i>Maritime</i>	264
<i>Land</i>	264
<i>Aeronautical</i>	265
Handheld and MSS broadband strong in the region.....	265
<i>M2M</i>	265
<i>Handheld</i>	265
<i>MSS Broadband</i>	265

Asia Pacific

Asian MSS market positioned for growth	271
<i>Asia sees accelerating growth in recent years</i>	271
<i>MSS operators trying to secure market share in the region</i>	271
<i>A fragmented distribution network with some key regional players</i>	272
Regulatory aspects affecting MSS in Asia Pacific	272
<i>Asia still a very difficult and heterogeneous region in terms of regulations</i>	272
<i>Rules governing the frequencies allocation</i>	272
<i>Market access and licensing</i>	273
<i>Foreign ownership rules</i>	274
<i>Main regulatory issues and future prospectives</i>	274
The region is driven by a strong maritime market and progress on land.....	274
<i>Maritime</i>	274
<i>Land</i>	274
<i>Aeronautical</i>	275
Strong concentration of M2M asset tracking as well as handheld terminals.....	275
<i>M2M</i>	275
<i>Handheld</i>	275
<i>MSS Broadband</i>	275
