

Q1

Prospects for Space Exploration

Economic and strategic assessment of the space exploration sector, including an analysis and benchmark of government and commercial space exploration programs worldwide

€ 5,000

Q2

Government Space Programs

Economic assessment of space programs undertaken by government organizations worldwide. Key metrics such as public investment (funding) in space and government satellites to be launched are analyzed from different angles to provide a 360-degree view of government space programs

€ 7,000

Q3

Satellite-Based Earth Observation

Assessment of the current EO value chain, along with forecasts up to 2029. Each aspect of the value chain is taken in turn from government & private investment down to value-added services, providing a 360° view of the opportunities & issues related to the EO sector and how these trends will progress over the next 10 years

€ 7,000

Q4

FSS Capacity Pricing Trends

Current dynamics for the pricing of satellite capacity. The report examines a set of regional markets, together with a specific review of the mobility and government vertical markets

€ 5,000

Prospects for Maritime Satellite Communication

Provides an in-depth view of the sector dynamics, analysis and forecasts for the maritime satcom market. Seven comprehensive sections give a detailed analysis of trends and prospects within the major addressable maritime market segments

€ 5,000

Prospects for In-Flight Entertainment Connectivity

Analysis of the IFEC market for both commercial airlines and business aviation. An analysis of the various stakeholders in the ecosystem is presented along with Euroconsult's 10-year forecast for cabin connectivity

€ 5,000

Satellite Connectivity & Video Markets Survey

Provides the most complete and accurate picture of market conditions and extensive, insightful analysis of market trends

€ 7,000

Space Economy Report

Key trends and indicators on supply & demand from Euroconsult's reports complemented by additional dedicated research on the commercial satellite business providing a snapshot of the commercial satellite value chain. Along with the introductory/overview, sections on satellite manufacturing & launch services, satellite communications, Earth observation, and satellite navigation

€ 5,000

High Throughput Satellites

Highlights evolution of HTS systems & architectures over the last decade. Identifies & assesses HTS investment plans of all satellite operators. The projected take-up profile by frequency band of each vertical market is presented. All vertical market forecasts are built bottom-up & provide an overview of projected market take-up by region until 2025. Key forecasts included in Excel files

€ 5,000

Prospects for the Small Satellite Market

Global supply and demand analysis of government and commercial satellites up to 500 kg. It provides a comprehensive resource for assessment of both current and future trends

€ 5,000

Satellites to be Built & Launched

Exhaustive analysis of the worldwide satellite demand merging customers, applications and orbits. It includes all the key figures and analysis needed to understand the global space market, and the future opportunities and challenges

€ 7,000

Spaceport Benchmarks

Complete mapping and assessment of launch vehicles and spaceports available in the world

€ 5,000

DataBase of Connected Aircraft

**Quarterly updated*

The database provides an exhaustive list of more than 20,000 commercial aircraft, including information for every commercial aircraft flying in the world

€ 5,000

China Space Industry 2020

A deep-dive analysis of the Chinese space ecosystem and future expected evolutions

€ 5,000

Operators: Benchmark & Performance Review

List of publicly-listed and privately-held companies, global, regional and national operators. The result is a detailed profile of each company, providing exclusive data, expert review, and comprehensive analysis of both complex publicly-available information and hard-to-obtain private information

€ 5,000

Customized Data Set

**Available upon request*

Data tailored according to specific customer requirements, i.e. satcom industry data, launch and manufacturing of satellites, Earth observation estimated revenues by application, etc.

€ 5,000 to 10,000
